

August 30, 2016

Don Onwiler  
Executive Director  
National Conference on Weights & Measures  
1135 M Street, Suite 110  
Lincoln, Nebraska 68508

Dear Don:

As the submitter of the proposal #260-1 titled "Section 1.2.1. Inspection Lots and Section 3.10. Mulch and Soils Labeled by Volume" of the 2016 Publication 16 presented at the Annual Meeting in Denver, we wish to amend our proposal based on comments made during the voting session of the meeting.

The amendments are as follows:

Table 3-4 Specifications for Test Measures for Mulch and Soils

56.6L (2 cu ft) measures would remain at the existing historic interior dimensions of 12" x 12" x 27" and 9" x 16" x 27"

84.9L (3 cu ft) measures would remain at the existing historic interior dimensions of 12" x 12" x 39" and 9" x 16" x 39".

Further, note #2 in Table 3-4 is amended to read:

<sup>2</sup>. The height of the test measure shall be 355.6 mm (14 in) for a 1 cubic foot package, 685.8 mm (27 in) for a 1.5 - 2 cubic foot package or 990.6 mm (39 in) for a 3 cubic foot package. ~~may be reduced, but this will limit the volume of the package that can be tested.~~

That concludes our proposed amendments that we would like to submit to the National L&R Committee as well as the L&R Committees of all four regional weights & measures association meetings.

Please advise on any further steps we might need to follow in order to submit these proposed amendments to the existing proposal.

Sincerely,

A handwritten signature in blue ink, appearing to read "Robert C. LaGasse", is positioned above the printed name and title.

Robert C. LaGasse  
Executive Director
